Navigating for Success in the Upstream Evolution

18 November 2021 | Online

Antonio Dimabuyu

Executive Director, Upstream, IHS Markit

Antonio leads our Asia Pacific technical research teams on E&P subsurface data, upstream valuation and market intelligence. He is also one of our experts in subsurface storage and utilization research for Carbon Capture Utilization and Sequestration (CCUS) projects. He brings over 19 years in the upstream energy industry.

Antonio started as an asset geologist for Chevron/Unocal, working on geothermal/steam field exploration and development in the Philippines and Indonesia. He joined IHS Markit in 2007, initially handling field and basin focus research prior to moving to a regional management role. Throughout his stint with IHS Markit, he has been involved on projects and studies covering Asia Pacific upstream (basin assessment and ranking, reserves and production trend analysis, country entry analysis, exploration strategy planning, play analogue analysis) and CCUS.

Antonio has a Bachelor of Science degree in Geology from the University the Philippines. He is an active member of the South East Asia Petroleum Exploration Society.
